

Digital Footprints Bingo

We are going to play a bingo style game. You will receive a 4x4 bingo card. Use the web to find to see what your colleague's [digital footprint](#) looks like. You can use any site, application or service (Google, Facebook, Twitter, unit school/university website, intranet, LMS, email) to obtain the information.

Rules

- DO NOT ask these questions verbally.
- You can only use one person's name in a vertical. Horizontal or diagonal row
- In the blanks, you can make up (and answer) your own questions and answers.

Once you have found the answer the question, write their name on the dotted line and add the source where you found this information. When you have 4 in a row tweet / email #BINGO!
